ROYAL STAR MAGNOLIA (*Magnolia stellata* 'Royal Star')

★ New 'Royal Star' has large, pure white, 25 to 30 petal blossoms that literally cover the plant in a galaxy of bloom.

★ New 'Royal Star' blooms from a week to 10 days later than the ordinary stellata thereby reducing the disadvantages of blemished blossoms caused by spring frosts.

★ New 'Royal Star' is a compact robust plant with rich bright green foliage. It makes a saleable plant sooner than ordinary stellata.

★ New 'Royal Star' is offered now for the first time in limited quantity. You will want to be among the first to have this outstanding magnolia. Strong, healthy, 15-18", branched plants in attractive green 1 Gallon Lerio Nursericans. Order now from the schedule below. Plants will be ready May 15th and after.

(*) SHIPPING INFORMATION: Flats are packed in special strong cartons for safe shipment. Half flats must be ordered in multiples of two.

NOTE: Seedlings of hybrid clones do not present plants of character identical to the parent from which seed was picked and must not be named thereafter. A large enough percentage should, however, be of equal or better character as to make planting both profitable and interesting. Cultivar names and descriptions are used here for genetical interest only.
